PacsoftNG Visual Marina

A scaled representation of your marina, boatyard and mooring layout where users can immediately see the location of vessels drawn to scale, in slips/berths or on the hardstand making it easy to manage operations and plan bookings. Arrival and departure lists can be displayed to assist planning movements, and providing excellent management overview of the administration process.

› Visual representation of the marina, land, racked storage, car parks, or retail/commercial properties

› Berth, sites and vessels drawn to actual scale of the site and vessels

› Drag & Drop placement of a vessel, with customisable wizard to implement business rules

› Capable of displaying multiple marinas

› Display multiple maps within a marina to show higher detail of individual areas

› Hyperlinking between maps for easy navigation

› Easy vessel placement of vessels in Alongside berths with rafting or stern too

› Mapping of vessels on hardstand does not require fixed numbered sites – free format placing of vessel

› Sites shapes drawn top down for berths or land sites, by width and height for racks, and diameter for moorings

› Vessel name displayed for occupied, and berth name for unoccupied sites

› Mouse over display of more detailed information

› Right click for action menus, open customer, vessel and booking details

› Different Vessel shapes for yachts, motor vessel, & multi-hulls

› Vessel shapes are colour coded for booking, arrivals, current occupier, departing vessels, and display of multiple booked sites

› Multiple 'views', current occupancy, arrivals & departures, administration and site layout

› Automatic refresh for display on large screen presentation within the marina office

› Occupancy, arrival & departure display for forward or backward viewing of previous or future dates

› Hardstand or boatyard vessels drawn to scale and shown for the duration of the job

› Arrivals and Departures pop-up windows to allow planning berth allocations

› Save or print map display.
